GUIDLINES FOR CORRECTIONS ON THE LIST OF LIGHTS
(ED. 2008)

1. The corrections (changes, additions, deletes) of the List of Lights publication is included in the volume No IV of the monthly editions of the Notices to Mariners and are given in columns , as following :
 - a. **First Column:** The number of the Hellenic List of Lights (ΑΕΦ), which is affected by the corrections, is recorded. If the recorded number does not exist in the List of lights, then it is a new one and its characteristics must be recorded in the corresponding column of the List of Lights, between the ΑΕΦ.
 - b. **Other Columns:**
 - (1) The columns that are not affected are marked by two dashes (--). The recordable data of the columns that are affected should be written down, while deleting all the old data at the same time.
 - (2) Instructions to cover special occasions (deleting columns or all the columns of the cancelled light) are given in *italics*.

2. It is recommended that small extent corrections must be recorded by hand, while additions of new “ΑΕΦ” or corrections of greater extend will be cut out and pasted on the List of Lights.

3. Reference for the record of the monthly corrections is written in the following table.
